

Aktuelles zu z/VSE, z/VM and Linux on Z

47. COURSE-Tagung vom 18.-19. Februar 2019 in Wiesbaden

Gonzalo Muelas Serrano – guelas@de.ibm.com
Offering Manager for z/VSE & z/VM, IBM Systems
IBM Deutschland Research & Development GmbH

Dagmar Kruse – DKRUSE@de.ibm.com
Technical Sales Specialist for IBM Z, z/VSE, IBM Systems Hardware Sales

19th February 2019

Trademarks

The following are trademarks of the International Business Machines Corporation in the United States and/or other countries.

BladeCenter*	GDPS*	IBM z13*	PR/SM	System z9*	zSecure
DB2*	HiperSockets	IBM z14	RACF*	System z10*	z/VM*
DS6000*	HyperSwap	OMEGAMON*	Storwize*	Tivoli*	z Systems*
DS8000*	IBM LinuxONE	Performance Toolkit for VM	System Storage*	zEnterprise*	
ECKD	Emperor	Power*	System x*	z/OS*	
FICON*	IBM LinuxONE	PowerVM	System z*		
	Rockhopper				
	IBM Z*				

* Registered trademarks of IBM Corporation

The following are trademarks or registered trademarks of other companies.

Adobe, the Adobe logo, PostScript, and the PostScript logo are either registered trademarks or trademarks of Adobe Systems Incorporated in the United States, and/or other countries.

Cell Broadband Engine is a trademark of Sony Computer Entertainment, Inc. in the United States, other countries, or both and is used under license therefrom.

Intel, Intel logo, Intel Inside, Intel Inside logo, Intel Centrino, Intel Centrino logo, Celeron, Intel Xeon, Intel SpeedStep, Itanium, and Pentium are trademarks or registered trademarks of Intel Corporation or its subsidiaries in the United States and other countries.

IT Infrastructure Library is a registered trademark of the Central Computer and Telecommunications Agency which is now part of the Office of Government Commerce.

ITIL is a registered trademark, and a registered community trademark of the Office of Government Commerce, and is registered in the U.S. Patent and Trademark Office.

Java and all Java based trademarks and logos are trademarks or registered trademarks of Oracle and/or its affiliates.

Linear Tape-Open, LTO, the LTO Logo, Ultrium, and the Ultrium logo are trademarks of HP, IBM Corp. and Quantum in the U.S. and

Linux is a registered trademark of Linus Torvalds in the United States, other countries, or both.

Microsoft, Windows, Windows NT, and the Windows logo are trademarks of Microsoft Corporation in the United States, other countries, or both.

OpenStack is a trademark of OpenStack LLC. The OpenStack trademark policy is available on the [OpenStack website](#).

TEALEAF is a registered trademark of Tealeaf, an IBM Company.

Windows Server and the Windows logo are trademarks of the Microsoft group of countries.

Worklight is a trademark or registered trademark of Worklight, an IBM Company.

UNIX is a registered trademark of The Open Group in the United States and other countries.

Notes: * Other product and service names might be trademarks of IBM or other companies.

Performance is in Internal Throughput Rate (ITR) ratio based on measurements and projections using standard IBM benchmarks in a controlled environment. The actual throughput that any user will experience will vary depending upon considerations such as the amount of multiprogramming in the user's job stream, the I/O configuration, the storage configuration, and the workload processed. Therefore, no assurance can be given that an individual user will achieve throughput improvements equivalent to the performance ratios stated here.

IBM hardware products are manufactured from new parts, or new and serviceable used parts. Regardless, our warranty terms apply.

All customer examples cited or described in this presentation are presented as illustrations of the manner in which some customers have used IBM products and the results they may have achieved. Actual environmental costs and performance characteristics will vary depending on individual customer configurations and conditions.

This publication was produced in the United States. IBM may not offer the products, services or features discussed in this document in other countries, and the information may be subject to change without notice. Consult your local IBM business contact for information on the product or services available in your area.

All statements regarding IBM's future direction and intent are subject to change or withdrawal without notice, and represent goals and objectives only.

Information about non-IBM products is obtained from the manufacturers of those products or their published announcements. IBM has not tested those products and cannot confirm the performance, compatibility, or any other claims related to non-IBM products. Questions on the capabilities of non-IBM products should be addressed to the suppliers of those products.

Prices subject to change without notice. Contact your IBM representative or Business Partner for the most current pricing in your geography.

This information provides only general descriptions of the types and portions of workloads that are eligible for execution on Specialty Engines (e.g., zIIPs, zAAPs, and IFLs) ("SEs"). IBM authorizes customers to use IBM SE only to execute the processing of Eligible Workloads of specific Programs expressly authorized by IBM as specified in the "Authorized Use Table for IBM Machines" provided at www.ibm.com/systems/support/machine_warranties/machine_code/aut.html ("AUT"). No other workload processing is authorized for execution on an SE. IBM offers SE at a lower price than General Processors/Central Processors because customers are authorized to use SEs only to process certain types and/or amounts of workloads as specified by IBM in the AUT.

Notice Regarding Specialty Engines (e.g., zIIPs, zAAPs and IFLs):

Any information contained in this document regarding Specialty Engines ("SEs") and SE eligible workloads provides only general descriptions of the types and portions of workloads that are eligible for execution on Specialty Engines (e.g., zIIPs, zAAPs, and IFLs). IBM authorizes customers to use IBM SE only to execute the processing of Eligible Workloads of specific Programs expressly authorized by IBM as specified in the "Authorized Use Table for IBM Machines" provided at www.ibm.com/systems/support/machine_warranties/machine_code/aut.html ("AUT").

No other workload processing is authorized for execution on an SE.

IBM offers SEs at a lower price than General Processors/Central Processors because customers are authorized to use SEs only to process certain types and/or amounts of workloads as specified by IBM in the AUT.

Agenda

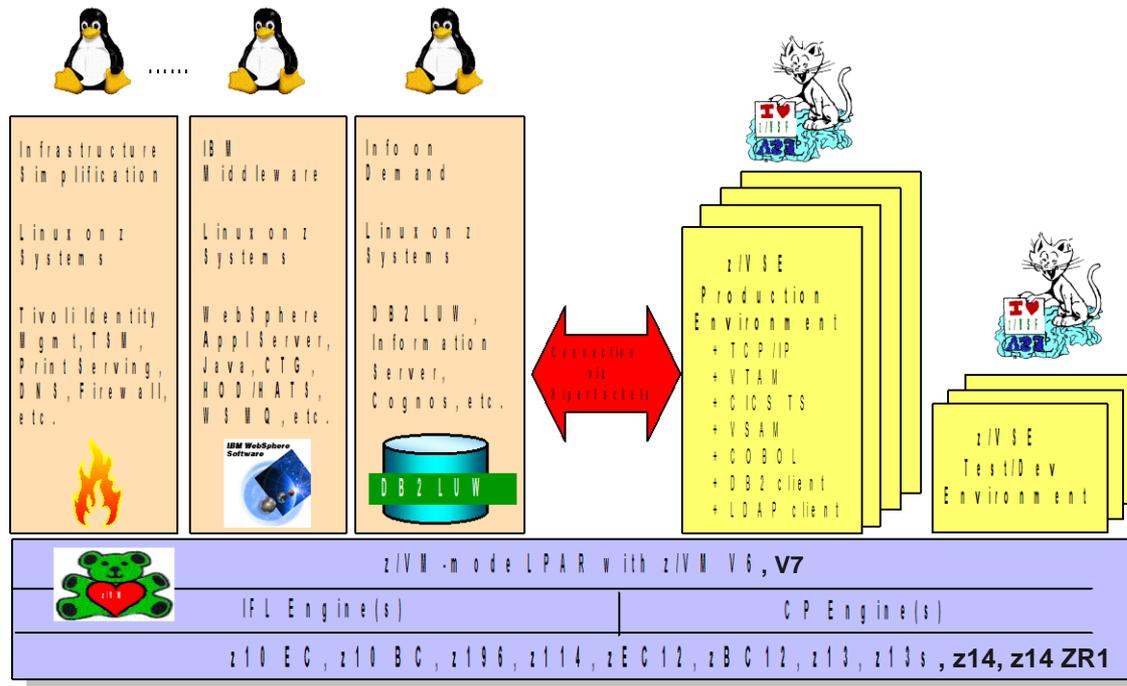

- **z/VSE**
- z/VM
- Linux on IBM Z
- Anhang
 - z/VSE Homepage
 - Migration auf z/VSE V6

z/VSE Strategy

- Protect** existing z/VSE investments
- Integrate** using middleware and z/VSE connectors
- Extend** with Linux on IBM Z technology & solutions

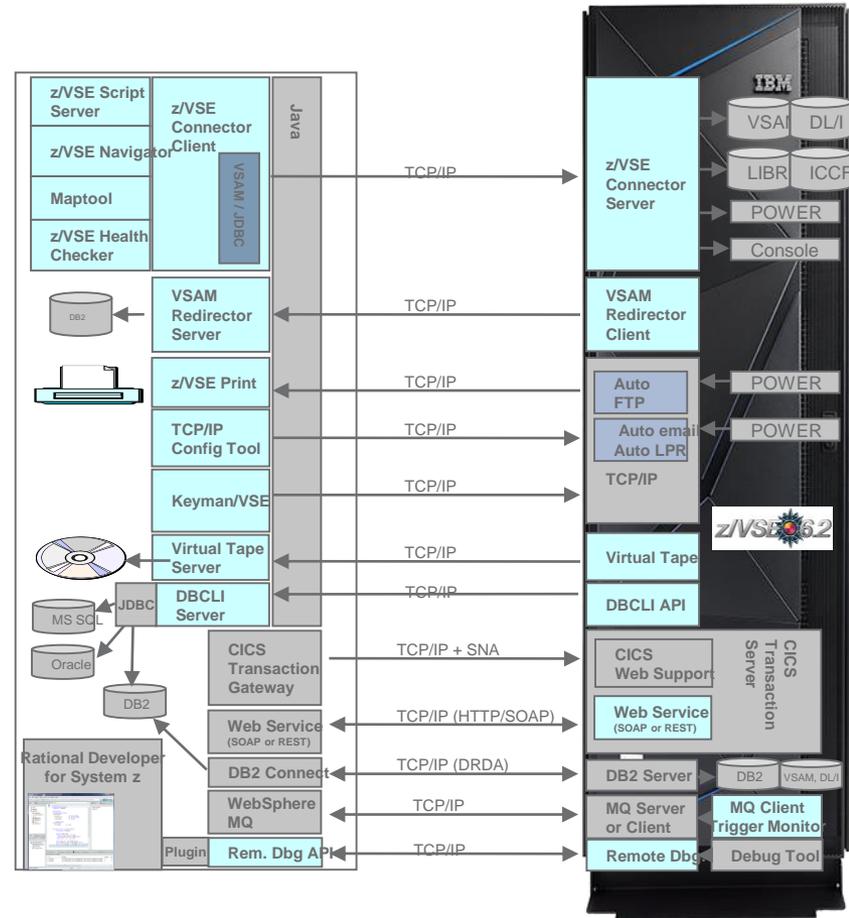

- Hybrid Environment leveraging z/VSE, z/VM, and Linux on IBM Z

z/VSE Connectors

- GUI to z/VSE: z/VSE Navigator
- z/VSE Health Checker
- z/VSE Monitoring: SNMP Agent
- Synch. of VSAM or DB2 data
- Integration of SQL DBs via DBCLI API
- 3270 -> Web : CICS Web Support
- Webservices (SOAP and REST)
- LAN Printer enablement
- Virtual Tape Server
- Operation/Workflow Integration with z/VSE Script Server
- GUI Development Env.

z/VSE Roadmap

z/VSE Continuous Delivery

DL/I 1.12.1 with support for >4GB, ICKDFS PAV
HW enablement, Networking, Security

z/VSE 6.2: GA: 1.12.2017

z114/z196 or newer, Migration Pricing Option
HW exploitation, CICS TS V2.2 (HTTP 1.1) & CICS
Explorer, RESTfull Engine, Easy of use, Networking and
Security enhancements

z/VSE 6.1 GA: 27.11.2015 **end of marketing: 1.12.2017**
end of service: 30.6.2019

CICS TS for z/VSE 2.1: CICS Explorer update,
Channels & Containers; TCP/IP for z/VSE 2.1,
IPv6/VSE 1.2, z10 or newer; z Systems exploitation

z/VSE 5.2 GA: 25.4.2014; **end of service: 31.10.2018**

zEnterprise exploitation, device support
Tapeless installation, networking / security enhancements

z/VSE 5.1 GA: 11.2011; **end of service: 30.6.2016**

64 bit virtual, zEnterprise exploitation, z9 or newer

z/VSE 5.1.1 GA: 6.2012: CICS Explorer, LFP in LPAR, database connector

z/VSE 5.1.2 GA: 6.2013: TS1140, 64 bit I/O, openSSL, db connector enhancements

z Systems support (or **not**)

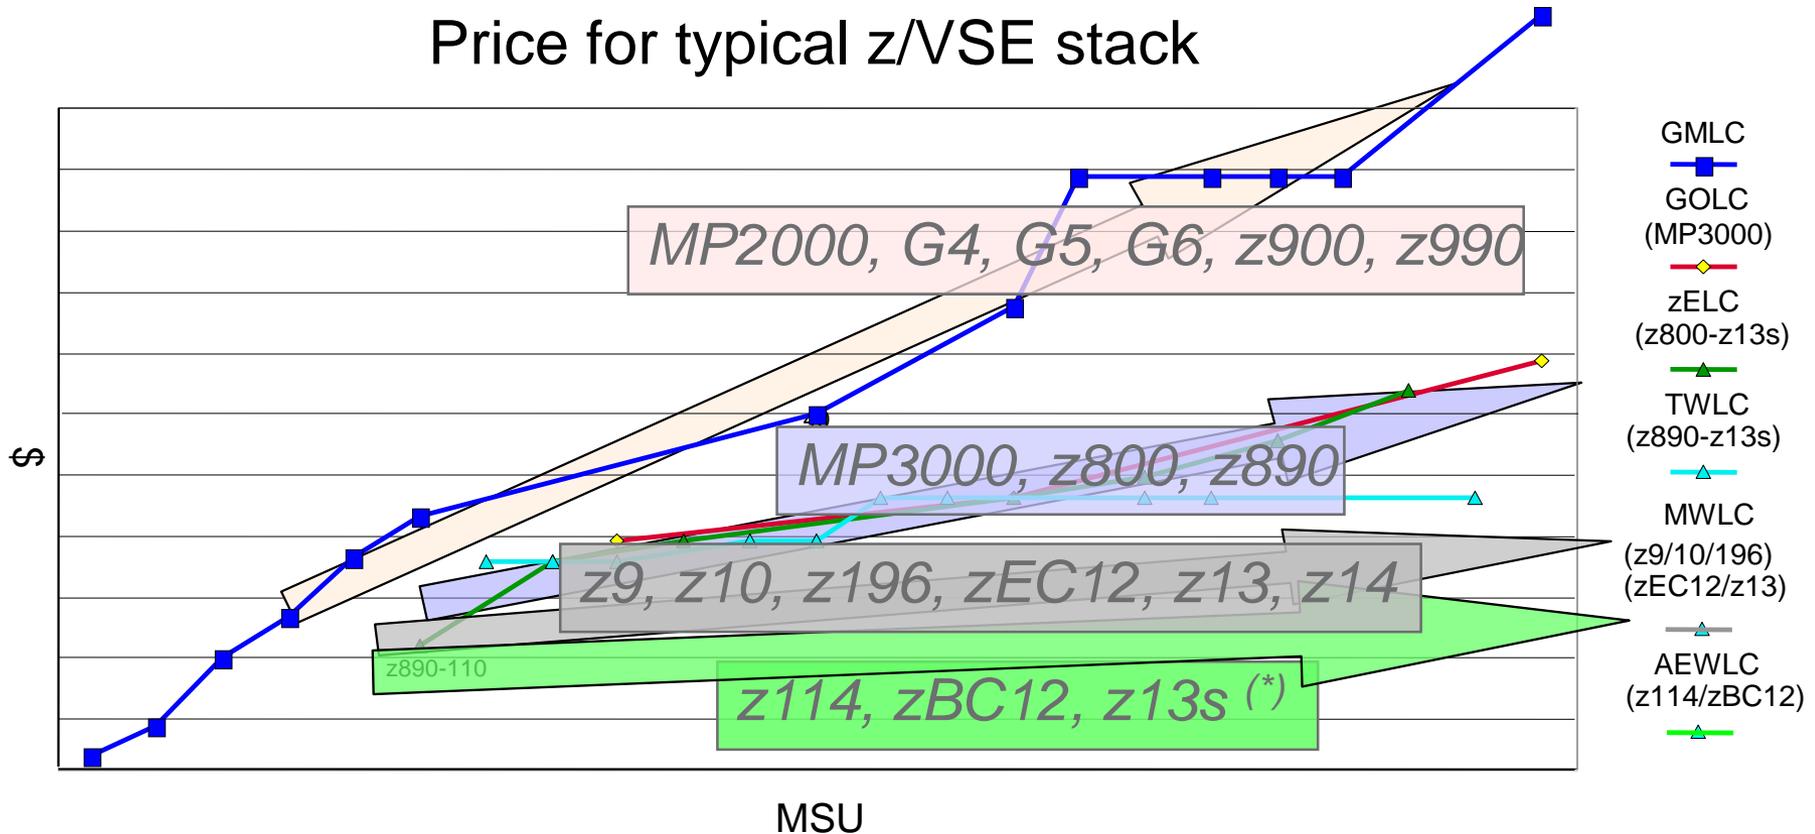

VSE Release	z900 / z800	z990 / z890	z9 EC (eos 10.2017) / z9 BC (eos 1.2019)	z10 EC / z10 BC (eos 12.2019)	z196 / z114 / zEC12 / zBC12 / z13 / z13s	z14
z/VSE 6.2	No	No	No	No	Yes	Yes
z/VSE 6.1 (eos 6.2019)	No	No	No	Yes	Yes	Yes
z/VSE 5.2 (eos 10.2018)	No	No	Yes	Yes	Yes	Yes
z/VSE 5.1 (eos 6.2016)	No	No	Yes	Yes	Yes	Yes restricted

z/VSE Software Pricing Metrics

Price for typical z/VSE stack

(*) The entry models of these servers, capacity settings A01 or 110, are priced using zELC.

Typical z/VSE stack consists of z/VSE Operating System, LE, CICS TS, VTAM, TCP/IP, DB2

AEWLC Technology Transition Offerings

- Technology Update Pricing for z14 Model ZR1 (TU6)
 - For stand-alone **z14 Model ZR1** servers
 - AEWLC **pricing reduction till 18%**
 - For more details, see announcement [link](#)
- Technology Update Pricing for z13s (TU4)
 - For stand-alone **z13s** servers
 - AEWLC **pricing reduction till 13%**
 - For more details, see announcement [link](#)
- Technology Update Pricing for zBC12 (TU2)
 - For stand-alone **zBC12** servers
 - AEWLC **pricing reduction till 5%**
 - For more details, see announcement [link](#)
- For more information about AEWLC see this [link](#)

Multi-Version Measurement (MVM)

- Multi-Version Measurement (MVM) was [announced](#) Feb. 14th 2017 and the earliest billing effective date is June 1st, 2017. See details [here](#)
- MVM allows clients to selectively deploy new software versions for an unlimited duration, providing more flexible control over their program upgrade cycles
- MVM can be use for:
 - Programs reporting **Sub-Capacity**
 - MVM enables the **combining of all the versions MSUs** to calculate the **latest version billable charges on the same machine**
 - **MVM requires SCRT V24.2.0 or SCRT V24.11.0.** Which are planned to be **available April 10th.** Report can be generated **May 2nd and submitted till May 9th.**
 - Programs **not** eligible for **Sub-Capacity**
 - MVM enables to **charge Full Capacity MSUs only** for the **latest** licensed **version** and charges for **any earlier versions** of the program are **waived**
- MVM replaces Single Version Charging (SVC), the Migration Pricing Option (MPO) and the IPLA Migration Grace Period
 - It simply **takes away the time limit**
 - If pre-MVM **time limit expired before May 31st, 2017,** must **request in writing to IBM** that MVM be applied

IBM Sub-Capacity Reporting Tool

- **Enables** z/VSE customers to **report and pay** only for the **MSUs used**
- For z/VSE **AEWLC** eligible products
- **IBM's policy** requires SCRT reports to be created using the **most current Version** of SCRT. However, IBM does **not require a specific Release or Modification level**.
 - The **Classic version** of SCRT is **no longer supported after October 2017** when SCRT V25 became available
 - **Currently only Java version available and supported**
- For **Java SCRT** and z/VSE **best practices and automation**, please see [Using SCRT \(Java Version\) with z/VSE - Best Practices \(PDF, 430KB\)](#)
- Latest **V26.1.0** (GA October 10th 2018) – **needed for reports from November 2018 on!**
- For more information on IBM SCRT see this [link](#)

Need something else?

- You may submit requirements at conferences (GSE, Tech. Univ., VM Workshop, ...)

z/VM V7.1 is here!

IBM Europe Software Announcement
ZP18-0376, dated August 7, 2018

IBM z/VM V7.1 Continuous Delivery model enables clients to exploit new and innovative z/VM capabilities at their own pace while helping to assure higher availability of their applications

Table of contents

1	Overview	10	Publications
2	Key prerequisites	10	Technical information
2	Planned availability date	18	Ordering information
2	Description	24	Terms and conditions
6	Product positioning	28	Prices
8	Statement of general direction	28	Announcement countries
9	Program number	29	Corrections

At a glance

IBM^(R) z/VM^(R) V7.1 offers a new release delivery and new function support cadence that gives clients an enhanced level of predictability for lifecycle management of their z/VM systems.

- Integrates the Single System Image (SSI) function into the base, at no additional cost, and withdraws the SSI feature.
- Increases the level of engagement with the z/VM user community.
- Enhances the dump process to reduce the time required to create and process dumps.
- Upgrades to a new Architecture Level Set. This requires an IBM zEnterprise^(R) EC12 or BC12, or later
- Provides the base for additional functionality to be delivered as service after general availability.
- Enhances the dynamic configuration capabilities of a running z/VM system with Dynamic Memory Downgrade support.

z/VM Release Status Summary

z/VM Level	GA	End of Service	End of Marketing	Minimum Processor Level	Maximum Processor Level	Security Level
7.1	09/2018			IBM System zEC12 & zBC12®		
6.4	11/2016			IBM System z196 & z114®	-	EAL 4+ OSPP-LS FIPS 140-2 ^[1]
6.3	7/2013	12/2017 ^[2]	11/2016	IBM System z10®	-	EAL 4+ OSPP-LS FIPS 140-2
6.2	12/2011	6/2017 ^[3]	7/2013	IBM System z10®	z13	-
5.4	9/2008	12/2017 ^[4]	3/2012	IBM eServer zSeries 800& 900	zEC12	-

^[1] Statements of Direction in the z/VM 6.4 announcement letter; Evaluation work in progress

^[2] Announced February 3, 2015

^[3] Announced February 2, 2016

^[4] Announced August 2, 2016

z/VM Continuous Delivery Release Model

Starting with z/VM V7.1 and current z/VM V6.4

24-Month Release Cycle

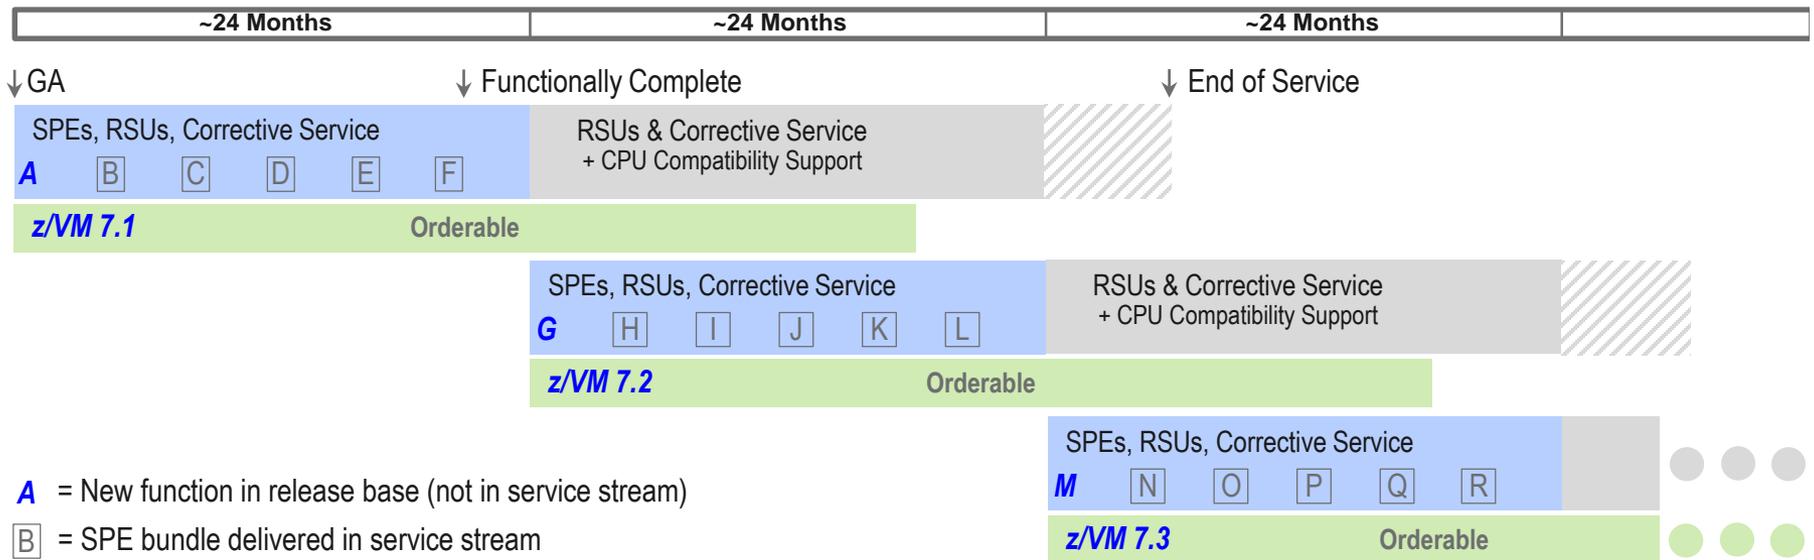

z/VM V6.4

Highlights:

- z/VM Release GAs: Every 2 years in 3rd Quarter of even years
- Releases remain orderable 18 months after GA of next release
- Last 6 months of release life cycle overlaps next two releases
- In service, roughly 4.5 years.

Clients are encouraged to “stay current” and move to a new release ASAP
 - Where applicable, product design decisions will favor the client who stays current
 Clients can migrate from one “service only” release to another if required
 Clients can run new release in test environment on prior release at any time

z/VM Version 6 Release 4

Designed for Clients of Today and Tomorrow

See <http://www.vm.ibm.com/zvm640/>

- ALS z114/z196
 - Scalability and TCO
 - More VMs in single footprint
 - Real LPAR Mem. to 2 TB, guest 1TB
 - Dynamic SMT without outage
 - *** **POST-GA** ***
 - **z/VM Sub-capacity pricing**
 - **Better paging with HyperPAV and zHPF**
 - **EAV minidisk enhancement**
 - **n-way processor scalability enhancement**
 - **Multi-VSwith Link Aggregation Global**
 - **z-Thin Provisioning - Extent Space Efficient**
 - Management of Diverse Workloads
 - Mem., scheduler, RAS SCSI
 - Free up paging space
 - Guest Large Page, TX, SIMD
 - *** **POST-GA** ***
 - **Tuning influencing parking processors**
 - **Inst. Exec. Protection, Pause-less GC,**
 - **zHPM with support resource pools**
 - Installation and Migration:
 - Upgrade in Place
 - DPM
 - Automation and SYSPROG effectiveness:
 - CP Env. variables
 - Extra info on Shutdown
 - CMS Pipelines integration
 - Cloud Deployment model/Provisioning
 - Security
 - Query PTF, Local Mods, Disk conf. info
 - EXPLORE FCP (SCSI SAN Discovery)
 - *** **POST-GA** ***
 - **Dump time enhancement (dropping page table guests)**
 - **Adobe Indexed PDF Collection**
 - **FCP Monitor Enhancements**
 - **Perf. Toolkit HyperPAV support**
 - **IBM Infrastructure Suite for z/VM and Linux on Z**
 - Other:
 - Default VLAN ID disable with an ESM
 - TLS 1.1/1.2 default
 - DirMAint to RACF Connector
 - RSCS TCPNJE traffic encrypted
 - *** **POST-GA** ***
 - **RACF Sec. Policy enhancement.**
 - **TLS/SSL Server with HW Crypto enablement**
 - **Network Security NICDEFs from user directory**
 - **FTP client firewall friendly**
 - **Encrypted Paging**
 - SET DIALDROP command
 - *** **POST-GA** ***
 - **Enable dynamically change of distributed IUCV policy**
- Future new function: <http://www.vm.ibm.com/newfunction/>
Closed new function PTFs: <http://www.vm.ibm.com/service/vmnfapar.html>

New Function APARs

New function in progress	Target date	Last updated
4TB Main Memory Support *	TBD	May 29, 2018
Automatic STANDBY Memory for Guests *	3rd Quarter 2019	December 11, 2018
Centralized Service Management	3rd Quarter 2020	December 13, 2018
CPU Measurement Facility Host Sampler Exploitation	TBD	December 12, 2018
Dynamic Crypto	3rd Quarter 2019	December 13, 2018
Dynamic Memory Downgrade	TBD	December 11, 2018
EAV Paging *	2nd Quarter 2019	December 13, 2018
Fast Minidisk Erase *	TBD	December 11, 2018
Group Memory Limiting *	TBD	July 23, 2018
More than 64 Logical Processors *	2nd Quarter 2019	December 13, 2018
MSS Multi-Target PPRC Exploitation *	3rd Quarter 2020	July 23, 2018
Multifactor Authentication for z/VM *	TBD	April 9, 2018
SSI Eight Member Clusters	TBD	June 21, 2018
TLS / SSL Client Certificate Verification *	2019	December 11, 2018
VSwitch Priority Queuing	March 2019	December 13, 2018
ZHPM Application *	TBD	March 8, 2018

* Denotes the z/VM team is seeking Sponsor Users. See New Function APAR for more information.

Available new function	Date released	Last updated
Dump Scalability	September 21, 2018	September 25, 2018
Elliptic Curve Support	December 13, 2018	January 28, 2019
Encrypted Paging	December 15, 2017	March 19, 2018
ESM Authorization and Auditing of SMAPI Requests	September 27, 2018	October 16, 2018
Extended Address Volume Minidisk Support	August 25, 2017	September 30, 2017
FCP Monitor Enhancements	April 2, 2018	April 9, 2018
Firewall Friendly FTP Client	August 23, 2017	September 30, 2017
Guest Exploitation for the Instruction Protection Facility	December 11, 2017	February 12, 2018
Guest Support for the Guarded Storage Facility	December 11, 2017	February 12, 2018
High PR/SM LPAR Management Time Relief	October 23, 2017	November 30, 2017
NICDEF Security Controls	August 4, 2017	September 30, 2017
Perfkit Support for HyperPAV Paging	April 13, 2018	April 18, 2018
Processor Scalability Efficiency Enhancements	August 23, 2017	September 30, 2017
RSCS Query System Service	December 4, 2018	December 11, 2018
Support for ZHPM CPU Resource Management	April 11, 2018	April 11, 2018
VSwitch Link Aggregation Load Balance Enhancements	December 15, 2017	December 14, 2017
z-Thin Provisioning	March 28, 2018	March 30, 2018

— Characteristics of a New Function APAR

New Function Information	
Name	The simple name of the project.
Description	A brief summary of what changes, who it effects, and why you would care.
Status	Along with the current status, this will give indication of key changes since the last iteration of this page.
Target availability	Depending on the project, where it is in the cycle, and other factors, this will list TBD, a quarter, a month, or, in cases where it has become available, a date. This is not a commitment and as more is learned about the work and priorities the target availability date will likely be adjusted.
Compatibility	This will describe how compatible an item is. In most cases, this will say 'No known incompatibilities'. It is not meant to list all details like a migration guide, but to give some indication of what to expect.
Enablement	This will briefly describe how enablement is managed for this Small Product Enhancement. Can it be enabled or disabled? What is the default? Can it be done dynamically? Is it on a virtual machine basis or system wide basis? It is not meant to describe all details of that process, but to give an idea of what's involved. Will also give indication of whether an IPL of the z/VM system is required, or just recycle of virtual machines or new CMS modules.
Effect	Describes what effect enabling the code may have beyond the compatibility statement above. Such as may slightly elongate logoff time or CCW translation code paths changed. These are basically meant to be hints as to how the system may respond or behave differently.
ISV impact	Indicates any impacts to ISV related products that are known, such as "If using a directory manager product, see vendor for required updates."
Linux or hardware interaction	Indicates whether a special level of Linux or hardware is required because of an interaction or dependency.
Release(s)	Indicates the releases planned for this enhancement.
Service details	See below for the IBM service information.
APAR	Information and link to the Authorized Program Analysis Report.
PTF	Information and link to the Program Temporary Fix.
RSU	Information and link to the Recommended Service Upgrade.

z/VM Sponsor Users

- Who are they? Customers and/or Vendors who want to directly help the IBM z/VM team design a product that will specifically meet Customer's and/or Vendor's needs MIGHT BE YOU ;-)
- Expectations:
 - Kickoff call to discuss the line item and gather feedback (1-1.5 hours)
 - Design approach review call to discuss the product after taking into account the initial feedback (1 hour)
 - Email exchange may take place if clarification or additional information is needed (1-2 hours)
 - Product showcase (1 hour)
 - Beta testing (time varies based on line item)
- More information: http://www.vm.ibm.com/sponsor_user/

IBM z/VM Council

http://www.vm.ibm.com/sponsor_user/zvm_council.html

Activities

- User Research
- New Project Introduction
- Sponsor User Recruitment
 - Design
 - Test
- Client Playbacks
- Project Proposal Definition and Prioritization

Membership

- **Open to any client** with a Customer Feedback Program Agreement in force
 - Evergreen agreement
 - Covers all company employees
- Each participant must have an IBM ID – <https://idaas.iam.ibm.com>

Client Membership Requirements

- Participate regularly and actively
- Sponsor at least one project per year
 - Participate in client playbacks
- Prioritize project proposals
- Complete assigned homework

Community

- Council communication mechanism

Meetings

- Approximately monthly, telephone and Web conference

Management Structure

- IBM Executive sponsor
- IBM Business leader
- Client Leaders
 - Help create agenda
 - Represent client viewpoints and interests
- IBM Leaders
 - Create agendas, schedule and facilitate meetings, manage Community

To Join the Council

- Identify colleagues who will participate
 - Ensure they have IBM IDs
- Send e-mail to Kerry Wilson - <mailto:kerryw@us.ibm.com>
 - Include participant names and e-mail addresses
 - Kerry will verify your company has a User Feedback Program Agreement in force or send a copy to sign and return
 - When agreement in place, participants will be added to meeting invitations and community

Need something else?

- You may submit requirements **preferably at the z/VM Council Community**
- Also at conferences (SHARE, GSE, Tech. Univ., VM Workshop)
- Or using the Request for Enhancements (RFE) database:
 - <http://www.ibm.com/developerworks/rfe/>
 - Please select the following for z/VM requirements:
 - Brand = Servers and System Software
 - Product = z/VM
- More information about z/VM can be found through the official web site:
 - <http://www.vm.ibm.com>
 - <http://www.vm.ibm.com/news/>

Agenda

- z/VSE
- z/VM
- **Linux on IBM Z**
- Anhang
 - z/VSE Homepage
 - Migration auf z/VSE V6

Linux on IBM z Systems Distributions (1/3)

- SUSE:
 - **SUSE Linux Enterprise Server 11**
 - GA 24.3.2009; Kernel 2.6.27 (**SP4: 3.0**); GCC 4.3.3 (SP4 4.3.4)
 - **SLES 11 SP4**: GA 15.7.2015; EOS 31.3.2019; LTSS: 31.3.2022

 - **SUSE Linux Enterprise Server 12**
 - GA 27.10.2014; Kernel 3.12; GCC 4.8
 - **SLES 12 SP4**: GA 12.12.2018; **Kernel 4.12**; GCC 4.8
 - Last SP EOS 31.10.2024; LTSS: 31.10.2027

 - **SUSE Linux Enterprise Server 15**
 - GA 16.07.2018; Kernel 4.12; GCC 7.0

z/VSE Homepage - 1 : <https://www.ibm.com/zvse/>

<https://www.ibm.com/it-infrastructure/z/zvse>

The screenshot shows the IBM z/VSE homepage in a browser window. The browser address bar displays <https://www.ibm.com/it-infrastructure/z/zvse>. The page header includes the IBM logo and 'IT Infrastructure' navigation. A dropdown menu is open under 'OS', listing 'Linux', 'z/OS', 'z/VM', 'z/VSE', and 'View all OS >>'. A red horizontal line is drawn across the page, passing through the 'z/VSE' menu item. On the right side, a box labeled 'IBM allgemein' has a red arrow pointing up and another pointing down to a box labeled 'z/VSE'. At the bottom, a navigation bar contains 'Products', 'Downloads', 'Events and education', and 'Resources' (which is highlighted with a red box). Below this is the slogan 'Protect, integrate and extend' and the text 'IBM z/VSE is an easy to manage and widely-used IBM Z operating system for reliable and secure'. A yellow 'Let's talk' button is in the bottom right, with a speech bubble containing 'Kontakt z/VSE' pointing to it.

Agenda

- z/VSE
- z/VM
- Linux on IBM Z
- **Anhang**
 - z/VSE Homepage
 - **Migration auf z/VSE V6**

Migration auf z/VSE V6: neue IBM-Lizenzen

Für z/VSE V6 brauchen Sie **neue Lizenzen** für

z/VSE V6 (5686-VS6)	bisher	z/VSE Central Functions V9/8 (5686-CF9/8/n)
CICS TS for z/VSE V2 (5655-VSE)	bisher	CICS TS for VSE/ESA V1.1.1 (5648-054)

Und wenn Sie über IBM lizenziert haben, auch für

IBM TCP/IP for z/VSE V2 (5686-CS1)	bisher	IBM TCP/IP for VSE/ESA V15F (5686-A04)
---	--------	---

und das **General Print Service (GPS)-Feature**.

Für **IBM TCP/IP for z/VSE V2** brauchen Sie auch **neue IBM-KEYs!**

- **IBM SW-Lizenzen gelten immer pro Version des SW-Produktes (neue Produktnummer)**
- Es gibt keine neue Version / Produktnummer bei IBM Optional Products
- Für z/VSE gibt es **Multi-Version Measurement (MVM)**
 - MVM ersetzt ~~Migration Pricing Option (MPO)~~ und ~~Single Version Charging (SVC)~~
- es wird nur ein Preis für die Produktfamilie (und zwar für die neuste SW-Version) berechnet
- z/VSE V6 bestellen Sie über IBM ShopZ: <https://www-03.ibm.com/software/shopzseries/ShopzSeries.wss?action=login>

Migration auf z/VSE V6

Migration auf z/VSE V6.2 von

- z/VSE V5.x , V4.x,... → Neuinstallation ist zwingend
- z/VSE V6.1 → Fast Service Upgrade (FSU) möglich

Beachten Sie die Installationshinweise

Neuinstallation der z/VSE-Basis

- Plattenwechsel auf größeres Modell oder anderen Devicetyp möglich
- CICS Transaction Security nur noch über BSM Control File möglich
DTSECTXN wird im z/VSE V6.2 **NICHT** mehr unterstützt
- NOPDS im z/VSE definieren
- VSAM-Kataloge, Libraries, etc erweitern
- Aktuellen Service einspielen (Service-Stand auf Base Tape: **10.05.2017**)
 - Recommended Service Level (RSL) – alle verfügbaren PTFs vom 10.01.2019
 - Preventive Service Planning (PSP) – HIPER PTFs, suche „zvse620“ bei <http://www14.software.ibm.com/webapp/set2/psearch/search?domain=psp>
- ...

Anpassen an eigene Anforderungen und Anwendungen einpflegen

- CICS TS , VSAM- Kataloge, TCP/IP,

Informationen zu z/VSE V6.x + Migration

- **Release Guide:** z/VSE V6.x - Überblick
